

Mayor Report
May 8, 2023

1. Attend the May ACT meeting on May 4th. DNREC announced that the contract to re-nourish beach dunes for the Delaware coast will occur now include going from south to north starting in Fenwick Island. This is good news for South Bethany and we are now scheduled to start on June 1. Other items discussed were:
 - The recent approval of HB1 and HB2 on Marijuana. All ACT members are working on Ordinances on this issue and will share with one another. This will be on the Town Council Agenda in May for discussion.
 - HB 127 was discussed regarding Fire Company funding. The Towns were in support of this bill. I plan to send an email to the Bill sponsor in support.
 - A discussion was held with Sen. Carpers office on the WRDA bill and how we can take advantage of it. I plan to discuss with the Town Council how we may be able to take advantage of this bill and gain access to the Army Corp for studying some of our issues.
2. Attended a meeting with Bethany Beach, Sea Colony and Fenwick Island regarding the renewal of the BBFD EMS agreement. The Agreement is set to renew in January 2024.
3. Attended the Weekly Meeting on FY23 DE beach re-nourishment. Currently South Bethany is scheduled for a start of May 30 for beach re-nourishment. It will take approximately 19 days. This is all subject to change based on weather and any equipment issues.
